Profession of Pharmacy

Pharmacy as profession is responsible for the appropriate use of medicines, medical devices and services to achieve optimal therapeutic outcomes. The current philosophy of profession of pharmacy practice is to provide “pharmaceutical care” in order to achieve desired results that improve patients' quality of life. Pharmacists dispense prescription medications and provide information to the patients about the drugs and their use. They also advise physicians and other healthcare workers on the selection, dosage interaction and side effects of the medications to treat health problems.
